

Complete Reference

github.com/wdunlevy/claude-cheatsheet

● Create ● Validate ● Ship ● Non-code

- **/using-superpowers** Discover available skills

- **/brainstorming** Creative exploration before code
- **/writing-plans** Implementation plans from specs
- **/writing-skills** Create or edit CC skills
- **/receiving-code-review** Handle review feedback
- **/requesting-code-review** Request review of work
- **/systematic-debugging** Structured bug investigation
- **/test-driven-development** Tests before implementation
- **/verification-before-completion** Verify before claiming done
- **/dispatching-parallel-agents** Run 2+ tasks concurrently
- **/executing-plans** Execute plan task-by-task
- **/finishing-a-development-branch** Merge, PR, keep, or discard
- **/subagent-driven-development** Parallel subagent execution
- **/using-git-worktrees** Isolated worktree setup

- [/code-review](#) Code review a PR

- **/review** Review a pull request
- **/review-pr** Multi-agent PR review
- **/clean_gone** Clean deleted remote branches
- **/commit** Git commit (conventional msg)
- **/commit-push-pr** Commit + push + open PR

- **/feature-dev** Guided feature dev + architecture

- **/claude-md-improver** Audit CLAUDE.md quality
- **/revise-claude-md** Update CLAUDE.md from session
- **/run** Launch app to see change working
- **/security-review** Security review pending changes
- **/simplify** Review code for reuse & clarity
- **/verify** Verify change by running the app

- **/dataviz** Chart & dashboard design system

- **/deep-research** Multi-source cited research report
- **/frontend-design** Production-grade frontend UI
- **/playground** Interactive HTML explorers
- **/skill-creator** Create & benchmark skills

- `/cursor` Open Cursor IDE for cwd

- **/claude-automation-recommender** Recommend automations
- **/init** Initialize new CLAUDE.md
- **/keybindings-help** Customize shortcuts
- **/fewer-permission-prompts** Auto-allowlist read-only tools
- **/update-config** Edit settings.json / hooks
- **/claude-api** Build with Claude API / SDK
- **/new-sdk-app** Create Agent SDK app

- **/loop** Recurring prompt interval
- **/schedule** Cron-scheduled remote agents

- **/add-dir** Add working directory
- **/branch** Fork conversation (*/fork*)
- **/btw** Side question mid-response
- **/clear** Clear & start fresh
- **/compact** Summarize to free context
- **/memory** View/edit persistent memory
- **/plan** Enter plan mode
- **/rename** Name current session
- **/resume** Resume previous conversation
- **/rewind** Undo code changes

```
/execute-plan → /executing-plans · /write-plan → /writing-plans ·  
/brainstorm → /brainstorming · /output-style → /config
```

- ! Bash mode (shell commands)
- / Slash commands & skills
- @ File paths, agents, MCP resources
- & Send to background agent
- Shift+↵ Insert newline in prompt
- Tab Autocomplete file / command
- ↑ / ↓ Cycle prompt history
- Esc Interrupt (2x to clear input)
- Ctrl+U Clear input line
- Ctrl+K Cut to end of line

- Ctrl+Y** Yank (paste cut text)
- Alt+Y** Yank-pop (cycle kill ring)
- Shift+Tab** Toggle auto-accept edits
- Ctrl+O** Transcript / verbose output
- Ctrl+R** History search (bash-style)
- Ctrl+S** Stash prompt (save for later)
- Ctrl+G** Edit prompt in \$EDITOR
- Ctrl+X Ctrl+E** Edit in \$EDITOR (alt)
- Ctrl+L** Clear screen & redraw
- Ctrl+Z** Suspend (fg to resume)

- **/color** Prompt bar color
- **/config** Settings (/settings)
- **/copy** Copy response / code blocks
- **/effort** Thinking effort (○ ◉ ●)
- **/export** Export conversation
- **/fast** Toggle fast mode
- **/model** Switch model
- **/theme** Color theme
- **/voice** Voice input (push-to-talk)

- **/cheatsheet** Generate reference PDF
- **/context** Context window breakdown
- **/cost** Session cost & tokens
- **/debug** Debug current session
- **/doctor** Config & env diagnostics
- **/feedback** Submit feedback
- **/help** Show help
- **/release-notes** View release notes
- **/stats** Personal usage stats
- **/status** System & account status
- **/usage** Plan usage limits

- **/agents** List agents
- **/extra-usage** Purchase extra usage
- **/ide** IDE extension
- **/imessage:access** iMessage access policy
- **/imessage:configure** iMessage channel setup
- **/mcp** MCP servers
- **/mintlify** Build Mintlify docs
- **/permissions** Tool permission rules
- **/plugins** Plugin management
- **/remote-control** Bridge to claude.ai/code
- **/sandbox** Bash sandboxing
- **/skills** List skills
- **/terminal-setup** Terminal integration
- **/todos** Current todo items
- **/upgrade** Switch to Max plan

- p, --print** Non-interactive output (pipes)
- c, --continue** Continue last conversation
- r, --resume [id]** Resume by session ID
- w, --worktree [name]** Isolated git worktree
- bg, --background** Start as background agent
- n, --name <name>** Session display name
- session-id <uuid>** Fixed session UUID
- from-pr [pr]** Resume PR-linked session
- fork-session** New ID when resuming
- model <model>** opus / sonnet / haiku
- effort <level>** low / med / high / max
- agent <agent>** Use specific agent

- agents <json> Custom agent definitions
- fallback-model <m> Overload fallback (--print)
- brief Agent-to-user messaging
- [no-]chrome Chrome integration on/off
- ide Auto-connect to IDE on startup
- add-dir <dirs> Additional directories
- file <specs> Fetch file resources
- system-prompt <text> Override system prompt
- append-system-prompt Append to system prompt
- exclude-dynamic-system-prompt-sections Cross-user cache reuse
- settings <file|ison> Load settings

- ```
--setting-sources <S> user / project / local
--mcp-config <files> MCP server configs
--strict-mcp-config Only --mcp-config MCPs
--plugin-dir <path> Plugins from directory
--plugin-url <url> Fetch plugin .zip from URL
--tools <tools> Restrict available tools
--allowed-tools <t> Whitelist specific tools
--disallowed-tools <t> Deny specific tools
--disable-slash-commands Disable all skills
--permission-mode <m> default / plan / auto / ...
--dangerously-skip-permissions Bypass checks
```

**--allow-dangerously-skip-permissions** Enable bypass option

**--bare** Minimal mode (no hooks/LSP)

**--safe-mode** Disable all customizations

**--output-format <fmt>** text / json / stream-json

**--input-format <fmt>** text / stream-json

**--json-schema <schema>** Structured output

**--include-partial-messages** Partial stream chunks

**--include-hook-events** Hook events in stream-json

**--forward-subagent-text** Forward subagent text (--print stream-json)

**--replay-user-messages** Echo user input on stdout

**--prompt-suggestions** Emit predicted next prompt

**--verbose** Verbose mode override

**--ax-screen-reader** Screen-reader friendly output

**--max-budget-usd <\$>** Spending cap

**--no-session-persistence** Ephemeral session (--print)

**--tmux** tmux session (with -w)

**--remote-control [name]** Start with Remote Control on

**--remote-control-session-name-prefix** RC session name prefix

**-d, --debug [filter]** Debug mode

**--debug-file <path>** Debug log to file

**--betas <betas>** Beta API headers

**-v, --version** Show version

**claude auth** login / status / logout

**claude agents** List configured agents

**claude auto-mode** Auto mode classifier

**claude doctor** Health check

**claude gateway** Enterprise auth/telemetry gateway

**claude mcp** add / remove / list servers

**claude plugin** install / enable / disable

**claude install** Install native build

**claude project** Manage project state

**claude setup-token** Long-lived auth token

**claude ultrareview** Cloud multi-agent code review

**claude update** Check & install updates
