

Claude Code

Complete Reference

Skills · commands · keys · CLI · v1.34 · 2026-08-30  
github.com/wdunleavy/claude-cheatsheet

● Create ● Validate ● Ship ● Non-code

PROJECT-SPECIFIC

● **/cursor** Open Cursor IDE for cwd

SETUP & CONFIG

● **/claude-automation-recommender** Recommend automations  
● **/init** Initialize new CLAUDE.md  
● **/keybindings-help** Customize shortcuts  
● **/fewer-permission-prompts** Auto-allowlist read-only tools  
● **/update-config** Edit settings.json / hooks  
● **/claude-api** Build with Claude API / SDK  
● **/new-sdk-app** Create Agent SDK app

AUTOMATION

● **/workflow-authoring** Write Workflow tool scripts  
● **/loop** Recurring prompt interval  
● **/schedule** Cron-scheduled remote agents

DATA ENGINEERING (22 SKILLS)

warehouse-init · analyzing-data · airflow · authoring-dags · debugging-dags · testing-dags · deploying-airflow · airflow-hiti · airflow-plugins · cosmos-dbt-core · cosmos-dbt-fusion · checking-freshness · profiling-tables · tracing-upstream-lineage · tracing-downstream-lineage · annotating-task-lineage · creating-onlineage-extractors · setting-up-astro-project · managing-astro-local-env · managing-astro-deployments · troubleshooting-astro-deployments · migrating-airflow-2-to-3

SESSION & CONTEXT

● **/add-dir** Add working directory  
● **/branch** Fork conversation (/fork)  
● **/btw** Side question mid-response  
● **/clear** Clear & start fresh  
● **/compact** Summarize to free context  
● **/memory** View/edit persistent memory  
● **/plan** Enter plan mode  
● **/rename** Name current session  
● **/resume** Resume previous conversation  
● **/rewind** Undo code changes

DEPRECATED

/execute-plan → /executing-plans · /write-plan → /writing-plans · /brainstorm → /brainstorming · /output-style → /config

MODEL & OUTPUT

● **/color** Prompt bar color  
● **/config** Settings (/settings)  
● **/copy** Copy response / code blocks  
● **/effort** Thinking effort (○ ◐ ◑)  
● **/export** Export conversation  
● **/fast** Toggle fast mode  
● **/model** Switch model  
● **/theme** Color theme  
● **/voice** Voice input (push-to-talk)

INFO & DIAGNOSTICS

● **/cheatsheet** Generate reference PDF  
● **/context** Context window breakdown  
● **/cost** Session cost & tokens  
● **/debug** Debug current session  
● **/doctor** Config & env diagnostics  
● **/feedback** Submit feedback  
● **/help** Show help  
● **/release-notes** View release notes  
● **/stats** Personal usage stats  
● **/status** System & account status  
● **/usage** Plan usage limits

EXTENSIONS & INTEGRATIONS

● **/agents** List agents  
● **/extra-usage** Purchase extra usage  
● **/ide** IDE extension  
● **/message:access** iMessage access policy  
● **/message:configure** iMessage channel setup  
● **/mcp** MCP servers  
● **/mintlify** Build Mintlify docs  
● **/permissions** Tool permission rules  
● **/plugins** Plugin management  
● **/remote-control** Bridge to claude.ai/code  
● **/sandbox** Bash sandboxing  
● **/skills** List skills  
● **/terminal-setup** Terminal integration  
● **/todos** Current todo items  
● **/upgrade** Switch to Max plan

GIT & PR

● **/code-review** Code review a PR  
● **/review** Review a pull request  
● **/review-pr** Multi-agent PR review  
● **/clean\_gone** Clean deleted remote branches  
● **/commit** Git commit (conventional msg)  
● **/commit-push-pr** Commit + push + open PR

CODE QUALITY

● **/feature-dev** Guided feature dev + architecture  
● **/claude-md-improver** Audit CLAUDE.md quality  
● **/revise-claude-md** Update CLAUDE.md from session  
● **/run** Launch app to see change working  
● **/security-review** Security review pending changes  
● **/simplify** Review code for reuse & clarity  
● **/verify** Verify change by running the app

CREATIVE & DESIGN

● **/dataviz** Chart & dashboard design system  
● **/deep-research** Multi-source cited research report  
● **/frontend-design** Production-grade frontend UI  
● **/playground** Interactive HTML explorers  
● **/skill-creator** Create & benchmark skills

KEYBOARD SHORTCUTS

! Bash mode (shell commands)  
/ Slash commands & skills  
@ File paths, agents, MCP resources  
& Send to background agent  
Shift+↵ Insert newline in prompt  
Tab Autocomplete file / command  
↑ / ↓ Cycle prompt history  
Esc Interrupt (2× to clear input)  
Ctrl+U Clear input line  
Ctrl+K Cut to end of line

Ctrl+Y Yank (paste cut text)  
Alt+Y Yank-pop (cycle kill ring)  
Shift+Tab Toggle auto-accept edits  
Ctrl+O Transcript / verbose output  
Ctrl+R History search (bash-style)  
Ctrl+S Stash prompt (save for later)  
Ctrl+G Edit prompt in \$EDITOR  
Ctrl+X Ctrl+E Edit in \$EDITOR (alt)  
Ctrl+L Clear screen & redraw  
Ctrl+Z Suspend (fg to resume)

Ctrl+\_ Undo prompt input  
Alt+P Switch model (while typing)  
Alt+O Toggle fast mode  
Alt+T Toggle thinking mode  
Ctrl+V Paste images from clipboard  
Ctrl+B Background running task  
Ctrl+X Ctrl+K Kill all background agents  
Shift+\_ Expand teammate pane  
Space Push-to-talk (voice mode)

CLI — CLAUDE [OPTIONS] [PROMPT]

-p, --print Non-interactive output (pipes)  
-c, --continue Continue last conversation  
-r, --resume [id] Resume by session ID  
-w, --worktree [name] Isolated git worktree  
--bg, --background Start as background agent  
-n, --name <name> Session display name  
--session-id <uuid> Fixed session UUID  
--from-pr [pr] Resume PR-linked session  
--fork-session New ID when resuming  
--cloud [desc|id|url] Create or attach cloud session  
--environment <id> Cloud session on self-hosted env  
--teleport [session] Resume a teleport session

--model <model> opus / sonnet / haiku  
--effort <level> low / med / high / max  
--agent <agent> Use specific agent  
--agents <json> Custom agent definitions  
--fallback-model <m> Overload fallback (--print)  
--brief Agent-to-user messaging  
--[no-]chrome Chrome integration on/off  
--ide Auto-connect to IDE on startup  
--add-dir <dirs> Additional directories  
--file <specs> Fetch file resources  
--system-prompt <text> Override system prompt  
--append-system-prompt Append to system prompt

--exclude-dynamic-system-prompt-sections Cross-user cache reuse  
--settings <file|json> Load settings  
--setting-sources <s> user / project / local  
--mcp-config <files> MCP server configs  
--strict-mcp-config Only --mcp-config MCPs  
--plugin-dir <path> Plugins from directory  
--plugin-url <url> Fetch plugin .zip from URL  
--tools <tools> Restrict available tools  
--allowed-tools <t> Whitelist specific tools  
--disallowed-tools <t> Deny specific tools  
--disable-slash-commands Disable all skills

|                                                                            |                                                                    |                                                               |
|----------------------------------------------------------------------------|--------------------------------------------------------------------|---------------------------------------------------------------|
| <b>--permission-mode</b> <m> default / plan / auto / ...                   | <b>--verbose</b> Verbose mode override                             | <b>claude auto-mode</b> Auto mode classifier                  |
| <b>--dangerously-skip-permissions</b> Bypass checks                        | <b>--ax-screen-reader</b> Screen-reader friendly output            | <b>claude doctor</b> Health check                             |
| <b>--allow-dangerously-skip-permissions</b> Enable bypass option           | <b>--max-budget-usd</b> <\$> Spending cap                          | <b>claude gateway</b> Enterprise auth/telemetry gateway       |
| <b>--bare</b> Minimal mode (no hooks/LSP)                                  | <b>--no-session-persistence</b> Ephemeral session (--print)        | <b>claude import</b> Import config from other AI coder        |
| <b>--safe-mode</b> Disable all customizations                              | <b>--autocompact</b> <a tokens> Auto-compact window (100k–1M)      | <b>claude mcp</b> add / remove / list servers                 |
| <b>--restricted</b> Remove code-running tools & ignore user settings       | <b>--tmux</b> tmux session (with -w)                               | <b>claude plugin</b> install / enable / disable               |
| <b>--output-format</b> <fmt> text / json / stream-json                     | <b>--remote-control</b> [name] Start with Remote Control on prefix | <b>claude install</b> Install native build                    |
| <b>--input-format</b> <fmt> text / stream-json                             | <b>--remote-control-session-name-prefix</b> RC session name prefix | <b>claude project</b> Manage project state                    |
| <b>--json-schema</b> <schema> Structured output                            | <b>-d, --debug</b> [filter] Debug mode                             | <b>claude setup-token</b> Long-lived auth token               |
| <b>--include-partial-messages</b> Partial stream chunks                    | <b>--debug-file</b> <path> Debug log to file                       | <b>claude ultrareview</b> Cloud multi-agent code review       |
| <b>--include-hook-events</b> Hook events in stream-json                    | <b>--betas</b> <betas> Beta API headers                            | <b>claude update</b> Check & install updates                  |
| <b>--forward-subagent-text</b> Forward subagent text (--print stream-json) | <b>-v, --version</b> Show version                                  | <b>claude attach</b> <id> Open background session in terminal |
| <b>--replay-user-messages</b> Echo user input on stdout                    | <b>claude auth</b> login / status / logout                         | <b>claude logs</b> <id> Print background session output       |
| <b>--prompt-suggestions</b> Emit predicted next prompt                     | <b>claude agents</b> List configured agents                        | <b>claude respawn</b> [id] Restart background session(s)      |
|                                                                            |                                                                    | <b>claude rm</b> <id> Delete background session               |
|                                                                            |                                                                    | <b>claude stop</b> <id> Stop background session (kill)        |
